

## LED Spacelights for HD Cinema, TV Studio and Virtual Reality Digital Imaging

### A Bi-Color LED Spacelight that's:

- Easy to use
- Doesn't use a lot of juice
- Changes when technology does and
- Won't break the bank.

### The SpaceBox *IS* the New Spacelight.

The **SpaceBox** is **THE NEW LED spacelight**, designed around the nonstop needs of today's production dynamics.

It's a **simple, economical** and **efficient** idea that brings a fresh perspective to a classic studio lighting solution. The SpaceBox is a dimmable, two-channel, LED tube based, overhead space light fixture that can be operated in bi-color or single color modes.

Surprisingly bright with low power consumption along with the unique rectangular skirt format makes the SpaceBox an astoundingly efficient overhead fixture for today's small to medium, budget conscious facilities.

**It's Simple and Safe** – The user friendly, intuitive operation makes it simple and safe for all levels of production crews to use. Easy multi-option rigging, quick manipulation, no heat and low power draw make SpaceBox the most efficient LED spacelight available.
